The Fall of the Female Blondin.

From the Shipping and Merchantile Gazette. On Tuesday evening an intensely exciting scene was witnessed at Bolton. In connection with Mr. Pablo Fanque's cir-cus, the "Female Blondin" had been announced for an out-door performance. She was to walk along a rope fixed from the Old Coronation Mills to the top of the circus, the hight of the rope being about sixty feet, and the distance some eighty feet About half past seven the 'Female Blondin' entered the Coronation Mills, which are being pulled down, and ascended the rope. She sauntered along it for a few feet with a light and easy step, but at about fifteen feet from where she started there was a large ugly knot on the rope several inches long. She essayed to cross it, and then turned back. In a moment, however, she resumed her perilons journey, amid the breathless anxiety of thousands who stood Kleins, sheep-stealing. The evidence did sixty feet beneath her. She approached william, who was held in \$300 to answer a her last foot was leaving it she stumbled. At once she threw her pole to the crowd below, and with a desperate effort she grasped the rope. She is a strong muscular woman, and exerted herself greatly to regain a position on the rope, but hung suspended by the hands. The wildest excitement prevailed amongst the spectators. There were loud cries of "Lower the rope," which was done, but only for a very few feet. With more speed than it can be told, a great number of men massed themselves together at the place over which she hung by the rope, and begged her to let go and fall. She did so, and was caught by them, and although the distance fell was almost fifty feet, she sustained no injury beyond the fright and a shake.

A Terrible Responsibility.

From the New Orleans Pleayune, 19. About 6 o'clock yesterduy evening, it was whispered around that the Metropoliand relieve Captain Latigue, acting under anthority from the city. It was even intimated that a fight might be antici-pated, and to guard against all possible danger of a defeat, three hundred of the Metropolitan Police, under Captain Schriber, were put under marching orders. It was further intimated that the Rousseau street station would be the headquarters of the army of occupation. About 10 clock, therefore, the reporter found his way to the sixth precinct station, and found already assembled Lieutenant-Governor Dunn, Mr. Wm. McDuff, Mr. Raynel, Mr. Isabel, Captain George, Captain Cain, and several other gentlemen anxiously awaiting the result of events. The reporter found it extremely difficult to obtain any explicit information. A part of a battalion of Spanish soldiers—the Sam Quintin-is reported to have also made common cause with the insurgents during the engagement, but this I do credit. The victory of their friends field has considerably elatthe Cubans of Havana, but has had contrary effect upon the Spaniards here. Never have I seen them so gloomy, morose and bitter. They curse the Cubans more than ever, but at the same time, for something new, let the "niggers" come in for a very large share of their abuse. I told teers left here for Nuevitas that many has happened has given them reason, and they are not at all slow to remind people to defer their corn planting until last week of their expressed doubts. You will

as many as 220 having gone off in a single night, so that the hattalion had to be disbanded. This was the first attempt to have colored men fight for the Spanish cause, and Colonel Yoller's battalion furnishes the second, and the ill-luck in the two instances will probably preclude a third attempt being made. Spanish colored troops may hereafter be employed, as they are now to-day in Havana, on garrison and guard duty, but hardly for field service. In my humble opinion, the blacks and mulattees of Cuba, the Chinese coolies included among the last, are like the Cuban whites most overwhelmingly in favor of Cuban independence and tionallty, and will always practically demonstrate this whenever opportunities will present themselves.

I must here say that, according to a gentleman of Havana, whom I have generally found well posted, there have been four recent engagements fought between Nuevitas and Puerto Principe. The first was on the 30th of April at Altagracia, between the column of General Lesca and a body of insurgents under Gen. Castillo; the second on May 1, on Bayatabo Hill though the losses of either side in both of them did not exceed one hundred and The third engagement was that of Gen. Lesca, mentioned above, in which, even according to the meager but vainglorious accounts of the Spaniards, the troops lost the field and abandoned a Letona and Quesada, and it was here that savior of the day to the insurgents; that Spaniards were so badly thrashed.

There is not a word of truth in the Key West telegram published in all the Ameri can papers, that the Cuban revolutionists had held a convention at Sibianicu, presided over by Captain-General Cespedes, at which resolutions were passed in favor of independence and annexation to the United States. The Cubans justly complain that reports so injurious to the re the journals of republican America. nine-tenths of the Cubans are in favor of uban independence, but it is even questionable whether a majority of this ninetenths desire annexation, and printed reports that the Cuban leaders ha n favor of this, even though false, give to the Spaniards a strong weapon which they are not slow to use to the detriment of the

An engagement of importance is likely to occur at any moment between General Letona's army and that of General Quesada, in the environs of Las Minas. The insurgent sucesses in the district of Puerto Principe have rendered the Cubaus of Havana brimful of joy, and many are very imprudently giving rather public expression to it, which may yet cause an attack upon them by the vexed volunteers, and so this and willful acts of murder and bloodshed. The Pope-The Amnesty.

From Gallgnani.

Pio Nono has now a few months of comparative rest before him previous to the great undertaking of the Ecumenical for which preparations both metaphysical and material are actively outinuing, in contradiction to recent rumore that impediments to its realization had occurred. The political amnesty granted by the Pope, on the occasion of the prisoners susceptible of that act of sovereign grace, on account of their refusal to sign the document required of them before being set at liberty, in which they are made to express penitence for past misdreds, and to promise to abstain from all future attempts against the Pontifical government. condemned as participators in the Fausti-Venanzi (so called) conspiracy prefer repenitence naining in gaol to professing for crimes which they deny having ever

committed.

The Abbe Ciclolini, editor of the Giornale di Roma, has received the Pope's comnands to compile a chronicle of the late festivities, with the Royal letters, messages, and telegrams of congratulation, and those catalogues of the presents sent to him in money, and objects of all sorts. When the chronicle is completed, 1,000 copies de luxe will be printed for the Catholic sovereigns, bishops, and other dignitaries who rejoiced with the Pope on the late occasion, and copies of less splendor will be sent to the numerous associations and individuals whose addresses or gifts reached his Holiness at the same time. The Crown Prince of Monaco is said to have sned for the hand of the remaining unmarried half sister of King Fraucis II. of Naples. Three neplews of Pio Nono were in Rome during the fetes, and received the sacra-ment from his hand, but no mention of hem was made in the lists of illustrious visitors, in accordance with the express wish of his Holiness.

We can but hope that all this news may be confirmed and that the cause of the Cubans may raise up for them the friends they so much need in this hour of their trial. The odds are fearfully against them, but the race is not always to the swift nor the battle to the strong. Other peoples have fought and won the great battle of freedom under eircumstances not more advantageous than those that now surround the Cubans. And, although the news from the island is to be taken with some eantion, we hope that all we have heard is true about the formation of the government and the victories that have attended the Cuban arms in the field.

There can be no doubt that the Cuban in this struggle against Spain have the sympathy of the world. formidable Obstacle-Cau it be Operated in Winter.

To the Editor of the N. Y. Tribune: Str-An experience of many years in the Rocky Mountains, and of these, six win-ters on the line of the U. P. R. R., con-vinces me that the present route can never be relied on for a winter route. All the old inhabitants of this country, as well as those freighters and others who have passed through the country for many years past, are of this opinion, and unite in saying that "the Pacific road of the country must run south of Colorado." The great cause of trouble on this road arises from The great the fact that the region of the heaviest snowfall on the line of the road is also the regions of the hardest winds. These would undoubtedly be called "hurricanes" in the is very fine, and drifts so densely into the ents that a shovel will not remove it. effectual attempts to force through and it only yields to the stubborn pick of the Irishman. Hundreds can testify to this. When a cut is cleared of snow it frequently refills before the train can get through. This was of frequent occurrence last winter, and is well known by passengers and residents on the line of the road. One instance in purticular occurred at the time of the first blockade. At or near Percy Station a cut was cleared of snow and the

The editors of St. Louis had a pleasant Station a cut was cleared of snow, and the train, drawn by two or more engines, which ran back about a mile in order to gather Colfax was received with honors at Springfield, Illinois. A salute was fired snow had again been blown into the cut that the train could not force its way through. Another fact is worthy of through. The Secretary of the Treasury has directed the Treasurer at New York to sell in what is known as the "Elk Mountain \$2,000,000 gold per week in lieu of one Country." Here the road runs for about seventy miles almost parallel with the high range of mountains of which "Elk Mountain' is the most prominent, yet those who Boutwell to abandon his present policy, live in that country and have done so for and to sell gold for greenbacks to apply to years testify that this is one of the mildest winters known there for many years. If a road is blockaded for a month in a mild winter, what may we look for in

> The "Bridger Country," or that portion of the road from Green river to Wahsatch, is usually quite as bad as the Elk Mountain country both as regards snow and wind, but the same mild winter was felt there in a greater degree. This is on the very severe one on another. Fences will accordingly be built and other precautions taken, and the next winter they will b found to be where they are not neededthe trouble will "break out in a fresh place," where the road is totally unprepared for it. Thus, the first winter the road was run ning, a distance of three hundred miles on the plains, it was blocked for three weeks at one time in Nebraska! The road had not then attracted sufficient travel or notice to cause this fact to be noticed.

It is claimed that fences and sheds will obviate the difficulty entirely. On the Black Hills the company erected costly tone fences, sometimes three, one behin the other, but, so far from being a remedy, the road was blocked for nearly a week at Wooden fences, if high enough to catch any considerable amount of snow, can scarcely be made strong enough to withstand the wind, and, if low and strong will not protect from snow. Sheds will be broken down by the weight of snow in the calm districts, and in the region of wind must be made tight like a house, and have doors at each end, or they will fill full of snow. The short tunnel east of Benton filled with snow the same as the cuts. The officers of the road speak as confidently of obviating the difficulties in the future as they in former years spoke of not meeting them, when warned by those who knew The employes on the roads in the North States, say the experience of years there

NEW YORK, May 20. NEW SCHOOL PRESENTERIAN ASSEMBLY. At the opening of the New School General Assembly, in Rev. Dr. Hatfield's church, corner of Park avenué and Thirty-fifth street, the Rev. Dr. Jonathan F. Stearns, Moderator of the last Assembly, occupied the chair. Rev. D. P. Hatfield, D.D., of New York, acted as stated clerk, and Rev. G. Lentworth Butler, D.D., as permanent clerk. There was a large attendance of delegates, and the gallaries were croweded with spectators to whom the procroweded with spectators, to whom the proceedings were evidently of the greatest interest. It is expected 250 delegates will be present during the session. Not more than two-thirds of this number had arrived when the proceedings began. The session will continue about ten days.

The exercises were opened by a voluntary upon the organ, after which Rev. Geo. Maxwell, D. D., of Cincinnati, offered up a prayer. Rev. COMMERCIAL.

There is no change in the aspect of business affairs demanding special remark or extended comments. Complaints of of rain. apathy in the general markets are becoming frequent, and dealers are apprehensive of protracted dullness. There is, however, a fair trade in commodities of home necessity, and in the aggregate the showing does not warrant unusual despond- for Pittsburg and other points. ency. Buyers are more than usually cautious; purchases are light but frequent, and this phase of trade matters affords reasonable grounds for believing that business will continue healthy if not active

during the summer season. We note an improved inquiry for bag-ging, with sales of round lots of 2-pound heinp at 21c; these, however, are extreme inside figures, dealers generally holding at 21\frac{1}{21}n22c, and on orders at 22a23c for hemp and flax. .

Dealers report a firmer feeling in cotton, with reduced stocks and an advance in prices; middling is held at 26 a 26 a 26 a 26 c, low middling 25 a 25 a c; other grades unchanged. We note sales of 12-oz star candles at

priecs which show slight concessions by manufacturers. Prices, however, are quotably unchniged. There is continued firmness in hay, with sales of choice timothy on the wharf at \$23 50 per tun.

TURF, FIELD AND FARM.

IT is the organ of all respectable Jockey Clubs, and therefore the leading turf journal in America. It discusses agriculture, both scientifically and practically, and especial attention is given to the sparts of the field. Those who believe in the gun, the rod and the bat, consult its columns with pleasure and profit. The paper denoances puglism and all low, disgusting sports. Billiards receive due attention.

As a literary paper, we claim a high place for the Turf, Field and Farm.

Its ment on this point has been generally cenceded to be superior to any of its predecesors in sporting literature.

Its correspondents are men of superior latellectual culture and attainments, and their ability is recognized as being of the highest order.

ability is recognized as being of the highest order.

Dramatic news, and criticisms on the drama and those connected with it, will be of the fullest description, and due care will be taken that they are truthful and just. Those who enjoy the more quiet aliurements of chess and draughts, will find the columns devoted to these subjects presided over by masters in that branch.

Breeding is ably discussed by practical and theoretical minds.

The Turf, Field and Farm is a marvel of success. The wealthy and cultivated gentlemen of America are its readers and patrons. Its articles on all subjects are widely quoted in the daily papers of Europe and America.

The paper is a weekly, the largest in the United States, and is published every Friday morning at 55 a year, in advance clubs, 41 a year, in advance by
